### **Change of internet provider**

In April 2022, the association will change provider of internet connection, IP telephony and IP-TV. The association has signed an agreement with Bahnhof, which means that all residents will have access to 1000 Mbit both upstream and downstream, compared to today 250 and 100 Mbit respectively. It also means a saving for the association.

More information about the change itself will come in the autumn.

### **We remove the tables in the area**

For a long time we have had problems with people who do not belong to the association using our seats we have in the area. Unfortunately, no consideration has been shown to the residents, but there have been loud noises during all hours of the day, suspected drug use and a general feeling of insecurity.

At the same time, several of these seats are used by our members, such as those who do not have a balcony or patio.

The board has already removed some of these seats when complaints have emerged from those who live around them. We have now decided that in the remaining places we will remove the tables, in the hope that these outsiders will move elsewhere. If this does not help, the next step will be to remove the benches as well.

### **Renovation**

Thank you to those of you who have applied for a permit for renovations. Through these, the association has been able to ensure that authorized companies are used and this has led to us having less water damage, which saves money and suffering for all of us. Are you going to renovate? Read more and apply for a permit here: <https://en.fano.se/renovation/>

### **Bulletin board**

During the general meeting, requests arose from residents that a place for grants should be available within the association. We have investigated the request and as there is limited space for the purpose due to information that affects all members and that there are many alternative ways to apply, we have decided not to proceed with the request.
