Annual general meeting moved!

Due to various reasons, the board has decided to move the annual general meeting. It will instead take place on **Monday, June 13th at 18:30**. As usual, we are located in **Kvarnbackaskolan's dining hall**. Entrance between the main building and the gym.

The annual report, the nomination committee's proposal, agenda, and the motions that have been received will be distributed shortly in all mailboxes.

The annual general meeting is our highest decision-making body where all of us members elect the representatives who we want to manage our association and the properties.

Pre-meeting before the meeting

We in Fanö have a tradition of having a "pre-meeting" before the annual general meeting. This is an opportunity to come and ask all sorts of questions to the board, questions that may not really belong at an annual meeting. It can be questions like that you think there should be more flowers in the flower beds, that your stairwell needs to be repainted, or perhaps you wish that we should have a summer party for all members. Things that do not require a formal decision.

The meeting has taken a break during the pandemic, but now it's back. We hold it just under a week before the general meeting, namely on **Tuesday, June 7th at 18:00 in the board room** (Sorögatan 45, entrance from Ärvingegången).

Welcome to these two meetings!

Cleaning day

Many thanks to everyone who came out and helped to fix things in our area. Also very fun to see so many show up in the board room and hang out with their neighbors.

We can also ascertain that a lot of rubbish was thrown away. We filled the two containers, at 30 cubic meters each, to the top!

Renovation

We would like to remind you of the importance of reading the information that is available and filling in an application if you intend to make a renovation of the home. This procedure has saved the association large costs as we can ensure that qualified contractors are used and that industry standards are followed. One of the most common causes of water damage (which is the most expensive type of damage) is that work has been inadequate.

So if you are going to renovate, read the information on the website first and if you have any questions, you are welcome to contact us at styrelsen@fano.se.
