The change to Bahnhof

On Thursday 31/3, the change took place to Bahnhof as the internet provider for the association. At the last check-up, about 250 people had activated their connections. If you need help activating yours, call Bahnhof on 010-510 00 00, unfortunately, they have a bit long waiting times in their phone queue.

Overall, we think the change has gone well. The disruptions that occurred in the weeks before, were due to the introduction of Common Electricity and not the change of internet provider.

We are aware that it hasn't gone smoothly for everyone, and it is of course regrettable that some have had problems. If you do not receive the help you need from Bahnhof, you can send an email to styrelsen@fano.se and we will see if we can assist.

Cleaning day

On Sunday the 24th of April we are having the spring-cleaning day. Cleaning of our bicycle sheds, tidying in our association, some coffee and being able to throw rubbish in containers. More info coming closer to the weekend in question.

Our homepage

We have a website where there is a lot of static information about laundry rooms, parking, waste management, and more. It is also the channel we try to use on occasions such as now that the change to Bahnhof was disrupted. So go to the page and look through the information there and keep it in mind if something bigger happens. We will try to get better at posting more current stuff on it.

It is available at <https://en.fano.se>

The project Joint electricity

N There was wrong information in the previous Fanö News. What happened during those announcements was that it was switched from eleven to eight incoming electricity connections to the entire association. During these power outages, network equipment in the area also lost its power and therefore the internet connection stopped working.

It is only in recent days that they have started to change electricity meters.

You still don't have to do anything, your electricity contract will be terminated automatically, and, in the future, your electricity consumption will be reported and paid for via the notices you receive from HSB with the fee to the association.

Cleaning of stroller room and bicycle sheds

It is up to those who use the storage areas for prams and bicycles who are responsible for cleaning them. A suitable opportunity to clear leaves and other things is on the cleaning day when there is material readily available.

It is also the case that only prams and bicycles should be stored in these storage rooms. During the cleaning day, the board will go through all the pram rooms and remove things that do not belong there. If you know you have things there, be sure to remove them before the cleaning day.

Questions?

You can always reach the board at styrelsen@fano.se. The email isn't monitored daily but you'll get a replay as soon as possible. Error reports must always be made to Nordstaden at 08-587 801 00.
