

Container for garbage

On Monday, August 26, there will be two containers in the center of the association where you can throw away trash just like on cleaning days. It is possible to throw away most things, but not hazardous waste (paint, oil, chemicals and such), tires, or electronics.

They will open at 18:00 and be open until they are full, but at the latest until 20:00. It is not allowed to leave things outside the containers.

Wednesday Coffee

After a summer break, the gatherings on Wednesday evenings are now starting again. We'll meet in the boardroom at Sorögatan 45 (entrance from Ärvingegången), drink some coffee or juice, eat some fika bread, and hang out. A way to get to know your neighbors. Welcome greetings from the Leisure Committee!

Free parking spaces

At the time of writing, there are a couple of parking spaces outdoor available. So if you need a parking space, contact HSB. However, it is limited to a maximum of two parking spaces per residence, of which a maximum of one is in a garage. The queue for a spot in the garage is however still quite long.

Trash left outside

Unfortunately, on several occasions during the summer, waste has been left at our garbage disposals around the association. This costs the association money as staff need to go around and take care of this. It also risks supplying the rats found throughout the Kista area.

If the garbage chute is full, you can go up one floor in the stairwell, alternatively go to another chute, there are seven outside in our association, and throw your garbage there. If it is full for more than 24 hours, report the fault to Nordstaden, and the contractor can investigate and fix it. If no one reports an error, no action will be taken.
